Fall Into Autumn Gardening

Autumn, the second spring, when every leaf is a flower!

ABOUT THIS GUIDE

"Gardeners are the world's premier optimists, as every new season is the start of the best ever!"
Texas Gardener, February 2003

It's time to fall in love with your Autumn season garden. One of the most affirming and enjoyable things about gardening is the fact that we keep getting another chance to get it right. If a planting fails, just pull it up and replant. Each season is a new chance to learn, experiment and gain expertise. With the right knowledge and seeds, anyone can successfully put a green thumb to work. Use this Autumn edition gardening guide to assist in achieving your gardening goals.

10 TIPS FOR A SUCCESSFUL TEXAS GARDEN AND LANDSCAPE

Follow these tips and tricks this season to insure a healthy and lovely garden and landscape.

1. Planning, Planning, Planning

Develop a garden plan for the coming season, both short and longer term. Know what it is you want to do before digging - what goes where and why.

2. Prepare Your Soil - Build On a Good Foundation

Soil is the foundation of any garden. Creating a hospitable home by matching the plant to the soil is the first essential step in successful landscapes and gardens. To find out the pH level and what nutrients your soil might be lacking, consider a soil test. Soil testing kits can be purchased from your local nursery.

There are two basic ways to improve your soil: Buy or make compost to add to the soil you have, or buy a soil mix. Build up your soil with a few inches of compost and whatever nutrients it may be lacking before planting.

3. Ensure Good Drainage

In Central Texas, it seems to be feast or famine when it comes to rainfall. Plant roots need oxygen and hate to sit in waterlogged soil. Creating raised beds with drains in garden borders can ensure good drainage when the rain keeps coming. Also, creating an underground gravel soakway or French drain system are easy "do-it-yourself" projects that will lead the water outside of your soaked areas.

4. Select the Right Sun Spots for Planting

Matching the right sun-exposed spots for planting with your garden variety is very important. Some plants worship the sun more than others. For example, fruit-bearing vegetables, like tomatoes and peppers, require at least six hours of sun a day, while leafy vegetables, like lettuce or spinach, can tolerate moderate shade. Always take the instructions on your seed packets and transplant packages seriously. Those instructions will almost always give guidance on what amount of light is needed for your plants to grow.

5. Timing is Everything!

For everything there is a season. This is very true for gardening since in most cases, there is a small window of time to plant that will ensure successful growth. See the Gardening Tips by Month section on pages 3-4 to see what to plant and when during the spring season.

6. Plant What Works in Texas

Plant your garden realistically with seeds and transplants based on plant varieties that are proven to work. Native plants belong here; they thrive with minimal care and provide habitat for local wildlife. A list of native and adaptable plants is available on page 5.

Pay attention to Hardiness Zones, which refers to defined geographic regions that can support specific plants, flowers and trees. The zones define a minimum range of temperatures that a plant or tree can survive safely in that zone. The most commonly used Hardiness Zones were defined by the USDA. Check out the Texas Hardiness Zone interactive map at www.plantmaps.com/interactive-texas-usda-plant-zone-hardiness-map.php

7. Your Plants Have to Eat Too!

- Make a fertilizing schedule: Vegetables and flowering annuals monthly; trees and shrubs twice a year; lawns every 10-12 weeks.
- Weeds will invade a garden that is suffering from lack of moisture. A thorough, deep soaking of the lawn every week is better than frequent, light watering.

8. Watch Out for Invasions!

Keep an eye on plants for evidence of insect damage and moisture. Pest and disease problems left to reach epidemic levels are much more difficult to control, and by the time you do something there may not be much crop left to save. For more information about pest and weed control options, consult your local nursery for products and advice.

9. Resist the Urge to Overplant

Inspiration can easily take us by storm, but resist the urge to overplant and bite off more than you can chew. When planting your new garden, consider what you actually have time to maintain. Most plants put in the ground or even in a pot will require some amount of labor on your part.

10. The More You Know, the More You'll Grow

Learn about the plants you grow. The more you learn, the more economical and enjoyable gardening will become. Consider taking the Master Gardener class in your county.

GARDENING AND LANDSCAPING TIPS BY MONTH

SEPTEMBER

Many plants will give you a great flush of blooms during the fall. As you can see below, there are many annuals that will bloom throughout the cool season. Have fun and enjoy your garden in the cooler weather! After all, you can have as much color around your house in the fall as you do in the spring.

- Make your selections of spring flowering bulbs as soon as they become available. Store bulbs in a cool place until ready to plant, the refrigerator is an excellent place (40 degrees).
- For maximum beauty and bloom of roses, continue insect and disease control sprays.
- Begin prepping plants for cooler weather by grooming potted plants that have been outdoors this summer. Re-pot or cut back overgrown plants, groom and fertilize before bringing them inside.
- September marks the beginning of the brown patch season on St. Augustine lawns. Apply PCNB (Terraclor) to those areas of the lawn with past history of brown patch. Also watch other lawn areas and apply control at the first sign of disease.
- Fertilize the lawn this month with a fertilizer containing a Nitrogen-Phosphorus-Potassium ration of 3-1-2.
- Fall flowering annuals and perennials still require plenty of moisture if the flowers are to be attractive. Don't be fooled by the cool night and moderate day temperatures.
- Clean established garden beds and replenish mulch materials where needed. Remove faded annuals and cut back perennials that have finished flowering.
- Plant wildflower seeds! They love full sun! This month is the ideal time to plant them for blooming in the upcoming Spring season.

WHAT TO PLANT IN SEPTEMBER:

Vegetable Plants: Broccoli, Brussels Sprouts, Cauliflower, Cabbage, Chinese Cabbage, Chard, Collards, Endive, Kale, Lettuce, Mustard, Onions, Greens, Spinach, and Turnips.

Herb Plants: Cilantro, Dill, Fennel, Borage, Caraway, Chamomile, Chervil, Chives, Cilantro, Dill, Fennel, Parsley, Summer Savory

Flower/Ornamental Seeds: Alyssum, Calendula, Cornflower, Delphinium, Hollyhock, Johnny Jump-up, Larkspur, Liatris, Love-in-a-mist, Pansy, Poppy, Snapdragon, Stock, Sweet Pea

Wildflowers: Bluebonnet and other wildflower seeds

Annual Flower/Ornamental Plants:

Alyssum, Aster, Calendula, Cornflower, Dianthus, Flowering Cabbage and Kale, Larkspur, Lobelia, Pansies, Petunia, Phlox, Snapdragon

Trees, Shrubs and Perennial Plants: All of them!
Fall is the best time for planting in Texas!

Ground Covers: Horseherb, Pigeonberry, Frog Fruit, Leadwort, Mountain Pea, Wedelia

GARDENING AND LANDSCAPING TIPS BY MONTH

OCTOBER

One huge benefit of planting in the fall - the weather. Beautiful crisp days are just right for digging in the earth. Instead of thinking of fall as football weather, think of it as garden weather. At the very least get off the couch and go out and dig a hole during half-time!

- If you didn't get around to fertilizing your lawn in September, a final application of fertilizer can be applied.
- It's time to plant spring flowering bulbs such as Allium, Amaryllis, Anemones, Daffodils, Dutch Iris, Grape Hyacinth, Hyacinths, Jonquils, Narcissus, Rain Lilies, Ranunculus, Snowflakes, and others.
- Keep a look out for aphids and caterpillars on fall flowers and leafy vegetables.
- Before storing metal gardening tools for the winter season: Clean, sharpen all hand tools and cover all metal parts with a light coat of oil. This will help prevent rust.
- Use those fall leaves: begin your own compost pile. Wet thoroughly as you build up the compost pile to hasten decomposition. Turn contents with shovel or spading fork periodically.
- Sow ryegrass for a winter green lawn or to prevent erosion of bare soil.
- You can still have your organic, home grown, veggies even if you don't have a yard. Many of the cool-weather veggies and herbs grow wonderfully in pots and are very attractive. Veggies such as lettuces, kale, cabbage, broccoli, bok choy, spinach, and others or herbs like dill, cilantro, parsley, oregano, thyme and many others will do great. Find a beautiful pot and add a good potting soil to plant seeds or use transplants. The pot can be protected during deep freezes using a frost cover or a blanket.
- Don't forget to harvest pumpkins for Halloween jack-o'-lantern carving!

WHAT TO PLANT IN OCTOBER:

Vegetable Seeds: Beets, Carrot, Chinese Cabbage, Collards, Garlic, Lettuce, Mustard, Onion, Garden Pea, Radishes, Spinach, Turnip

Vegetable Plants: Chinese Cabbage, Collards (and other Greens), Lettuce, Spinach, Turnip, Broccoli, Cabbage, Cauliflower, Chinese Greens, Lettuce, and Spinach can be planted throughout the fall, if they are given frost protection.

Herb Plants: Cilantro, Dill, Fennel, Parsley

Herb Seeds: Borage, Caraway, Chamomile, Chervil, Chives, Cilantro, Dill, Fennel, Parsley, Summer Savory

Annual Flower/Ornamental Seeds: Sweet Alyssum, Calendula, Centaurea, Coreopsis, Johnny Jump-Up, Larkspur, Nasturtium, Pansy, Poppy, Snapdragon, Sweet Pea

Plant Annual Flower/Ornamental Plants: Sweet Alyssum, Calendula, Centaurea, Coreopsis, Johnny Jump-Up, Larkspur, Nasturtium, Pansy, Poppy, Snapdragon, Sweet Pea

Trees, Shrubs, and Perennial Plants: All of them!
Fall is the best time for planting in Texas!

Ground Covers: Horseherb, Pigeonberry, Frog Fruit, Leadwort, Mountain Pea, Wedelia

Wildflowers: Bluebonnet and other wildflower seeds

GARDENING AND LANDSCAPING TIPS BY MONTH

NOVEMBER

Believe it or not, the first frost could come anytime now. Start preparing now so you do not get surprised and lose all those veggies and plants that you spent time nurturing. Often we have a frost and then have beautiful growing weather for several weeks, so if you can get some of those tender plants through the first freeze, you can enjoy them a while longer.

- Start thinking about roses. They can be planted in early winter so order those special rose varieties now for late delivery.
- It's time to clean annual and perennial beds. Rework annual beds and prepare for spring or fall planting.
- Continue to practice good garden sanitation. Keep leaves raked up and place on a compost pile.
- Annual Rye Grass will make a good ground cover for a new lawn to hold top soil in place and prevent tracking soil into the house.
- Don't forget to harvest your fall vegetables. They're not only wonderful to eat, but great for fall decorating too! Get inspired by cooking and decorating for Thanksgiving with your own fresh produce!
- Get ready to protect newly planted plants, tender vegetables and other tender plants before a freeze.
(1) Inspect and clean up potted plants and move indoors. (2) Mulch all plants, including trees and shrubs. (3) Water plants well before a freeze. Freeze damage occurs when ice crystals form inside plant cells and pierce the cell walls. A turgid plant cell (plump with water) is less likely to be ruptured by the ice crystals. (4) Cover plants with a blanket or row cover/frost cloth that reaches all the way to the ground. Heat from the ground will rise up under the cover keeping the area around the plant warm. Different thickness of covers will provide different levels of protection over susceptible plants in advance of a freeze.

WHAT TO PLANT IN NOVEMBER:

Vegetable Seeds:

Mustard, Radish, Spinach

Vegetable Plants:

Lettuce, Mustard and other Greens, Peas, Spinach

Fruit: Strawberries

Herb Plants: Cilantro, Dill, Fennel, Parsley and all perennial herbs such as Chives and Oregano

Annual Flower/Ornamental Seeds:

Sweet Alyssum, Calendula, Centaurea, Coreopsis, Delphinium, Larkspur, Linaria, Nemesia, Poppy, Snapdragon, Sweet Pea, Johnny Jump-Up

Annual Flower/Ornamental Plants: Dusty Miller, Flowering Kale and Cabbage, Nicotiana, Pansy, Snapdragon, Sweet Pea

Trees, Shrubs, Ground Covers, and Perennial Plants: All of them!
Fall is the best time for planting in Texas!

Wildflowers: This is your last chance to plant Bluebonnet and other wildflower seeds for the upcoming Spring season.

Plant bulbs: Amaryllis, Bearded Iris, Chinese Ground Orchid, Daffodils, Lilies

TEXAS NATIVE AND ADAPTIVE PLANTS

Those that thrive and survive in Central Texas

*Notes that the plant is native to Texas

Trees

Ash*, Cedar*, Cypress*, Elm*, Honey Mesquite*, Maple*, Oak*, Palmetto*, Pecan*, Mexican Sycamore, Anacacho Orchid*, Buckeye*

Yuccas/Agaves/Succulents

Agave (Blue, Century Plant*, Parry's*, Queen Victoria*, Squid), Basket Grass*, Cactus (Prickly Pear)*, Nolina*, Sotol*, Yucca (Giant, Paleleaf*, Red*, Softleaf, Spanish*, Twistleaf*)

Shrubs

Abelia, Acuba, Agarita*, American Beautyberry*, Aralia, Barbados, Cherry*, Barberry, Bottlebrush, Butterfly Bush*, Coralberry*, Cotoneaster, Dalea*, Elaeagnus, Elbow Bush*, Flame Acanthus*, Fragrant Mimosa*, Germander, Hawthorne, Holly*, Honeysuckle Bush*, Jasmine, Mallow*, Mistflower*, Mock Orange, Oleander, Palmetto*, Pineapple Guava, Roses (Belinda's, Grandma's, Cecile Brunner, Knock Out, Lady Banksia, Livin' Easy, Marie Daly, Martha, Mutabilis, Nearly Wild, Old Blush), Rosemary, Sage*, Senna, Skyflower, Sumac*, Thyrallis, Turk's Cap*

Ornamental Grasses

Fountain Grass, Inland Sea Oats*, Little Bluestem*, Mexican, Feathergrass*, Muhly (Bamboo, Big*, Deer*, Gulf*, Pine*)

Vines

Carolina Jessamine*, Coral Vine, Crossvine*, Fig Vine, Honeysuckle, Coral*, Jasmine, Passion Vine*, Trumpet Vine*, Virginia Creeper*, Wisteria*

Bulbs

Amaryllis, Bearded Iris, Chinese Ground Orchid, Daffodils, Lilies (Cooper's, Crinum, Oxblood/ Schoolhouse, Spider, Oxalis, Rainlilies

Ground Cover

Aztec Grass, Dalea, Greg*, Frogfruit*, Germander, Horseherb, Jasmine, Leadwort Plumbago, Liriope, Monkey Grass, Mountain Pea, Myoporum, Oregano, Pigeonberry*, Purple, Heart, Santolina, Sedge (Cherokee, Meadow, Texas)*, Sedum*, Silver Ponyfoot*, Violet*, Woolly Stemodia*

Water Plants

Coastal Water-hyssop*, Bandana-of-the-Everglades, Jamaican Sawgrass*, Lance-leaf Burhead*, Horsetail*, Scarlet Rose-mallow, Woolly Rose-mallow, Spider-lily, Zig-zag Iris, Virginia Blueflag, Soft Rush*, American Water-willow*, Salt Marsh-mallow, Cardinal Flower*, Water Clover*, Yellow Water Lotus, Yellow Cow-lily or Spatterdock*, White Water Lily, Marsh, Obedient Plant*, Marsh Fleabane*, Pickerelweed, Long-leaf or Knotty Pondweed*, White-topped Sedge or Star Sedge*, Delta Arrowhead, Arrowhead*, Lizard Tail, Trisquare Bulrush*, Giant Bulrush*, Powdery Thalia

Perennials

Artemesia, Black-eyed Susan*, Bulbine, Calyophus*, Cast Iron Plant, Chile Pequin*, Columbine*, Coralbean*, Coreopsis*, Cuphea, Daisy (Blackfoot*, Copper Canyon, Engelmann*), Damianita*, Yellow Bells*, Fall Aster*, Fern (Firecracker, River*), Firebush, Gaura*, Gayfeather*, Golden Groundsel*, Hibiscus*, Hymenoxys*, Indigo Spires*, Iris (Bearded), Lamb's Ear, Lantana (Texas*, Trailing), Lion's Tail, Marigold, Obedient Plant*, Penstemon (Gulf Coast, Hill Country, Rock)*, Phlox*, Plumbago, Pride of Barbados, Primrose*, Purple Coneflower*, Rock Rose*, Ruellia, Sage (Blue*, Jerusalem, Majestic, Mexican, Penstemon, Russian*, Tropical), Senna*, Shrimp Plant, Skeletonleaf Goldeneye*, Skullcap (Pink*, Heartleaf), Society Garlic, Spiderwort*, Texas Betony*, Verbena*, Winecup*, Yarrow, Zexmenia*

LOCAL GARDENING CLUBS AND ORGANIZATIONS

Get together with fellow gardeners who share your interest. These organizations provide opportunities for learning, volunteering, garden viewing, and general socializing. Visit the organization's website for membership, meeting, and event details.
